A Leap towards becoming the Global No.1 Brand

TCK Textiles realizes beautiful changes to the world. As a friend, we will continue to go forward, towards the every corner of the world and be firmly positioned as the global No.1 brand. TCK Textiles looks through tomorrow and beyond, creating a special future.

CEO's Message

We shall become a global textile materials company.

To specialize in the field of textiles, TCK Textiles Korea was established by the textile business sector of TORAY Chemical (previously, Woongjin Chemical) on December 1st, 2012.

With proven technology from TCK Textiles, our goal is to make human's daily life richer while leading the development of domestic textile industry. TCK Textiles drives the momentum for TORAY Chemical to further develop as the global chemical materials company that it has been in the past 40 years. Through continuous technology innovation and product development, we will be reborn as a global textile materials company in the future.

We will put customer satisfaction as our number one priority.

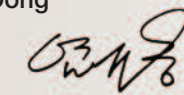

We are focusing on all our resources and competence to listen carefully to customer's requirements at any time and accomplish values to satisfy our customers. Backed by plenty of experience and proven technology accumulated for 40 years in the textile business, we will supply reliable products to customers.

Based on our proven competence that meets the market needs, we will respond to customer's requirements, promptly and systematically. Through it, we will become a company always relied upon by our customers and grow together with them.

In the future, with our proven technology, TCK Textiles will become a company leading the global market. Thank you for watching us with great interest and care in growing further.

“Backed by abundant experience and high-technology with 40 years of history, TCK Textiles will grow with our customers, and become a reliable company like, a good, old friend.”

CEO Yeom, Kee-Dong

Company Profile

Global Textile Materials Company

Since polyester blended yarn fabric was first produced in 1972 with TCK Textiles's own technology, we have produced and supplied various types of fabrics.

We developed differentiated products where unique touch and function are applied and led the trend in the fabric and textile business. They include synthetic products focusing on polyester materials, products blending natural materials and eco-friendly products. As a professional maker for high-function uniforms and non-clothing materials of high value, our proven quality and technology were recognized in the market.

TCK Textiles established a one-stop production system for weaving and dying processes, high-tech product production technology, and cutting-edge facilities for integrated production system. Now, we are leading both the domestic and overseas clothing and non-clothing markets to become the best fabric maker.

In the future, we will develop more differentiated products and value-added materials, and continue to create new applications to strengthen global competitiveness.

[Business Overview](#) | [Living Materials](#) [Apparel Fabric](#) [Uniform Fabric](#) [Heat Materials](#)

Living Materials

- MF CLEANER
- HOME INTERIOR

With its differentiated yarn and technology, TCK Textiles is exporting household cleaning products, fabric for interior use, and industrial fabric for the worldwide market. Our cleaning products using microfiber have excellent absorption, 3 to 4 times higher than cotton material, cleaning power, and anti-bacterial properties. Mop pad and clothing products, in particular, are well known for its quality and function by world famous companies in the US and Europe.

Home interior products consist of high-quality functional products using microfiber and anti-bacterial synthetic yarn and eco-friendly products using 'Phosphorus (P)' polyester, excellent in function and practicability. They are exported to Europe, a market leading fashion interior field.

MF CLEANER

Living Materials

Apparel Fabric

Uniform Fabric

MF (microfiber) cleaning products have excellent absorption, durability, contamination prevention and dirt removing ability. They are high-function products equipped with eco-friendly function-easy to use and washes reducing the use of detergents.

MOP

They are used to clean floors such as wet mop and dry mop. Using microfiber, surface contamination is clearly removed without micro scratches or stains. With prompt absorption and drying speed, easy to use, and also it is an eco-friendly product clearly cleans using less detergent.

Application

- Floor cleaners for offices, hotels, restaurants, schools and hospitals
- Dusters for interior and exterior of vehicles
- Glass cleaners for buildings and vehicles

CLOTH

Cloth products clean dust and stains in kitchens, floors, glasses, furniture, and cars without damage, safely and thoroughly. It is convenient to use them without water. Compared to cotton materials, it is excellent in absorption and drying.

Application

- Optical cleaners for glass, eye glass, camera lens
- Digital screen cleaners for LCD monitors, display screen of smart phones
- Removing dust and polishing car interior and exterior
- Cleaners in daily use for bathroom, kitchen, glass and pet care

Global Textile Materials Company

16 / 17

Home interior products consist of eco-friendly interior fabric. They include high-quality functional bedding fabric using microfiber and anti-bacterial yarn, and eco-friendly interior fabric using 'Phosphorus (P)' polyester Flame-Retardant yarn, harmless to human body.

BEDDING

Bedding fabric using anti-bacterial yarn of less than 1 μ m completely protects mites from penetrating while controlling bacterial multiplication. It prevents skin allergies caused by mites or mite secretion. Semi-permanent anti-bacterial properties are also maintained even after frequent washing or long use. The soft and powder touch, unique for microfiber, helps for pleasant bed time rests.

Application

- Bedding products such as bed mattresses, and covers for duvets, pillows, cushions, and sitting cushions

HOME INTERIOR

OFFICE CHAIR COVER

As an upholstery product made from inflammable or non-flammable materials, it is used for furniture. It is excellent in durability and colorfastness. Various color expression is available, and colors do not bleed out when washed. Thanks to its excellent elasticity, users feel comfort while sitting. It consists of various structures such as plain fabrics, oxford, canvas, and mesh.

Application

- Covers for office chairs, partition fabrics, covers for dining chairs, stool covers, and sun beds

Apparel Fabric

- APPAREL
- THOBE & LINING
- ILLUSION

With differentiated technology, TCK Textiles produces fabrics for apparel and thobe, and provides them to the worldwide market. Reading customer thoughts and leading trends, we're continuing to introduce new products. Our products satisfy and are relied upon by world-famous brands. In particular, the excellence of fabrics for thobe, developed by the exclusive technology of TCK Textiles, is widely acknowledged in the market worldwide. We promise, we'll definitely pay more effort to client's needs and do our best to create customer's welfare.

TCK Textiles produces and supplies high-function and high-sensitivity apparel fabrics. Various product groups include synthetic materials based on polyester, blended products mixed with natural materials, and eco-friendly products.

OUTERWEAR

As a high-density product, textured appearance can be great and by introducing special material, natural color can also be expressed. From polyester (polyester blended fabric), nylon (nylon blended) to human body-friendly natural fabrics (wool, cotton), combining various structures and after-specialized finishing, product is highly differentiated.

Application

- Men's casual jackets, women's casual jackets, jumpers, coats, field jackets, trench coats

Brand

- NEOMEX, BONO, COTTY, LUMINIX

STRETCH PANTS

As a product made of polyester (blended polyester), blended cotton, and blended wool, it is used for 1-way and 2-way stretch pants. Applying stretch function, workability is excellent. Realizing soft touch, users can experience comfort wearing feel.

Application

- Men's casual pants and jackets, women's casual pants and jackets, skirts, leggings, slim pants

Brand

- ECOJIN, FRESH, HYVAA

SUITING

It is a product for stretch and non-stretch suits, excellent in various textures. Using differentiated yarn, it doesn't wrinkle easily while having excellent drapery, also easy for cleaning and caring materials.

Application

- Men's suits, women's suits, one piece, dresses, pants

Brand

- NOBLE

WARM-UP

As a product of high-density and lighter weight, wearing feel is excellent. With excellent water-repellent and wind breaking effects, it is suitable for outdoor activities. It consists of polyester and nylon/polyester. With various after-processing and natural luster, appearance looks luxury.

Application

- Wind-resistant jackets, padding jumpers, padding vests, down-jumpers and jackets

Brand

- AIRY, BESTA

BLOUSE & DRESS

As women's tops products, trends such as soft touch, good drapery, printing, and texture are represented. From pastel color to vivid color, excellent color can be expressed. Using printing, various design applications can be developed.

Application

- Women's blouses, dresses, one piece

Brand

- BREEZE, MISTY

T I L L U S I O N

THOBE & LINING

THOBE

As a 100% polyester thobe fabric, it is produced by processing technology exclusive by TCK Textiles. Thobe is used as a traditional cloth in Middle Eastern countries such as Kuwait and Saudi Arabia. It is featured with subdued gloss, soft-touch & excellent color vision. Premium product using differentiated yarn has natural 2-tone effect. TCK Textiles is proud of its softer touch and deluxe appearance.

Application

- THOBE,
men's dress shirts

Brand

- DELUXE, GENUINE,
CUBIC

LINING

This premium lining product uses special yarn to provide silky luster property. Excellent stretch function and convenient wearing feel, it has excellent workability. Through special antistatic finishing exclusive from TCK Textiles, it protects from uncomfortable static. Soft-touch and various color realization also differentiates this product to harmonize with any kind of cloths.

Application

- Stretch linings, blouses

Brand

- SILKY LINING,
STRETCH LINING

ILLUSION

Using 2 different fabrics, we provide differentiated products for 3D effect. After you make garment with this fabric, wash it and check the 3D effect immediately. The special bonded fabrics make reducing of material cost, saving production lead time and free from difficulty of sawing. It is suitable for casual jacket, skirt and blouse.

Before

After

Application

- Blouse, dress, party wear, outer wear

Brand

- ILLUSION

Uniform Fabric

- MILITARY UNIFORM
- SCHOOL UNIFORM
- FIRE-RETARDANT FABRIC & DUST-FREE GARMENT
- WORKWEAR & HEAT VEST

TCK Textiles produces and supplies various uniform fabrics for military, policemen, and students. Thanks to its systematic one-stop production system and research and development from materials development to fabric production, we satisfy various requirements of customers. In particular, using differentiated yarns and high-function and high-tech materials, high-quality products satisfying activity, wearing feel, safety, and health at the same time are widely recognized both in domestic and overseas markets. Introducing various products meeting style, function, convenience, and comfort in future, we will continue to try our best to satisfy our customers.

MILITARY UNIFORM

From basic military uniform fabrics, required for fighting efficiency, to functional high-tech fabrics, TCK Textiles provides high-quality functional military uniforms using its in-depth experience.

COMBAT UNIFORM

With the know-how and technology of TCK Textiles, combat uniform fabrics with excellent concealment and activity are produced. Combining special processing technology such as semi-permanent antibiosis and anti-mosquito functions, combined processing is possible. Through process management with self-test equipment and night vision device, the highest quality is guaranteed.

Application

- Domestic : Military uniforms for the army, navy, and air forces, the marine corps, special forces, and information forces
- Overseas : Military uniforms in Spain, Singapore, Saudi Arabia, Malaysia, Italy, France, and Columbia

WATERPROOF & BREATHABLE FABRIC

Using our own dyeing technology, fabrics are strictly produced through a lamination process. Backed by proven adhesion technology and durability, moisture-proofing features are excellent. Using various membranes, we can also produce various products such as 2-layer, 3-layer, and functional coating fabrics.

Application

- Domestic : Military uniforms for the army, navy, and air forces, the Marine Corps, special forces, and information forces
- Overseas : Spain (warm-up clothing, weather suits), Turkey (warm-up clothing, sleeping bags, ponchos), warm-up clothing in Singapore, Columbia, Poland, and Russia

Using highly stretchy and differentiated fabrics, fabrics for school uniforms from TCK Textiles are excellent for activity and wearing feel. Introducing functional processing methods with anti-bacterial and anti-stain features, stains are easily removed. With our own dyeing process, it is a stylish high-quality product.

SHIRTS & BLOUSE

Applying cool comfort function and elasticity to blended fabrics of polyester and rayon, this fabric for school shirts and blouses are excellent in activity and wearing feel. Since it is excellent in see-through protection, ultraviolet rays, and wrinkle-free using nano ceramic fabrics, it is convenient to care for the products.

Application

- Student shirts and blouses

SCHOOL UNIFORM

JACKET & PANTS

Using blended materials of polyester, wool, and rayon, wearing feel and activity are excellent. With napping processing, it has excellent insulation. Thanks to deluxe appearance and wrinkle-free protection function, it also has a nice dressing style.

Application

- Student jackets, pants, skirts

FIRE-RETARDANT FABRIC & DUST-FREE GARMENT

FIRE-RETARDANT

Fire-retardant products produced by special eco-friendly production process have excellent durability. Since it is harmless to the human body, users can use them under dangerous construction sites. Even after being used for a long time, effects and functions are maintained. We produce and supply from cotton and blended cotton materials to various fire-retardant and aramid products.

Application

- Welding-work clothing in still mills and shipyards, factory work cloths in petrochemical plants, protective clothing for electrical work, forest fire extinguishing cloths, safety cloths, policemen protective cloths and special military uniforms

DUST-FREE GARMENT

Arranging and weaving Kanebo carbon conductive yarns with general yarns to prevent static electricity and ignition from flame while preventing dust and miscellaneous bacteria, it is used for dust-free garments. It has excellent seeing-through prevention and cold feel function. With soft touch feel, users are comfortable when wearing.

Application

- Dust-free garments for electronic, pharmaceutical and food companies, high-functional
- Dust-free garments for LED, LCD lines

WORKWEAR

Using materials such as cotton, polyester, rayon, and nylon, and special processing method, we produce various product lines from normal products to high-function and differentiated products. With prompt sweat absorption and drying function, it maintains its cozy feel. Its elasticity makes for increased activity. It also controls germs reproduction while improving hygienic properties with anti-bacterial function removing contaminants and is also anti-moisture.

Application

- Banking uniforms, office and construction uniforms, warm-up clothing, anti-static uniforms

WORKWEAR & HEAT VEST

HEAT VEST

'Warm Touch' heat vests come in size-adjustable Velcro type; they have warm-up and constant temperature effects using batteries combined inside the vests. It is easy to use and have excellent wearing feel. It is also helpful to health since it emits far-infrared radiation.

Application

- Military, traffic policemen, firefighters, street cleaners, mailmen; night-shift workers in general companies, security companies and parcel delivery service companies
- Outdoor leisure such as fishing and motorcycling

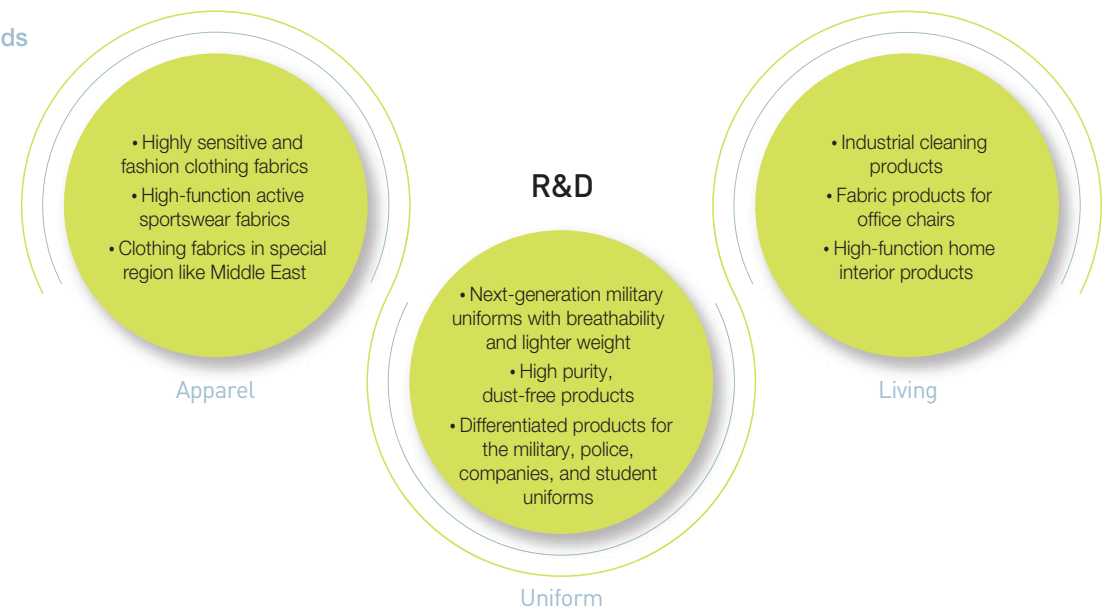

& Research Development

With high-technology backed by 40 years of history, TCK Textiles puts its utmost efforts to develop differentiated and value-added products.

We continue to study to develop products maximizing customer satisfaction. They include new products using new materials both domestic and overseas to lead the trend, and differentiated products combining various functions to high-sensitive materials having excellent wearing feel.

TCK Textiles will continuously develop value-added materials, and accumulate dyeing and processing technology to lead both the domestic and overseas textile markets.
